M&A in the United States

Deal Activity & Valuations

Deal Activity

Mergers and acquisitions activity through the end of the second quarter of 2020 fell 17% on a year-over-year basis as the continued economic effects of the coronavirus pandemic drastically impact deal activity in the United States. Additionally, total deal value continues to decline as acquirers have developed a more cautious approach to the deployment of capital, given the vast uncertainties surrounding the pandemic.

Valuations

Valuation multiples remained flat for Q2 2020 in comparison to Q1 2020. After reaching a high of 10.9x in 2019, the median Enterprise Value (EV) to EBITDA multiple declined by one full turn to 9.9x in 2020. While this still represents a high level by historical standards — a 34% increase compared to 2009 - valuation multiples may contract further for the remainder of 2020 given frequent fluctuations as presented in the stock market.
