

Approved Mobile Payments Content: Elan Partner Non-Paid Media Channels

Important Note:

The licensing agreement for Apple Pay®, Android Pay™, Samsung Pay, and Microsoft Wallet exists between these partners and Elan/U.S. Bank. In the absence of a separate written agreement, Elan financial institutions are not permitted to use any trademarks or intellectual property in any paid media advertisement.

However, our licensing agreement allows Elan partners to use the below approved messaging to distribute information via your own non-paid-media outlets such as your website, in-branch communications, email, etc. The content below cannot be modified, except to add your financial institution name. It must be used exactly as written and can be used in non-paid media channels ONLY.

Discover Mobile Purchasing

Today's smart phones are capable of doing amazing things. As a valued credit card member of Country Club Bank, we are excited to announce that you can now make mobile payments with a compatible Apple®, Android®, Windows or Samsung® phone, tablet or watch, without ever handing over your card.

Streamline Check Out

With mobile purchasing, at check out, you'll use your phone instead of swiping your card. Typically, you'll just hold your phone near the terminal and okay your purchase with a fingerprint. Signatures may still be required.

Simple to Setup

It doesn't matter whether you have an Apple, Android, Windows or Samsung device—setup is simple with each technology. In most cases, you add your card with your phone's camera.

Security Smarts

With mobile payments, instead of sharing your information, a virtual card number is created. That virtual number is used for purchases—keeping your data safe. Visit your phone provider website for more information on security.
