

# Touch ID for iPhone

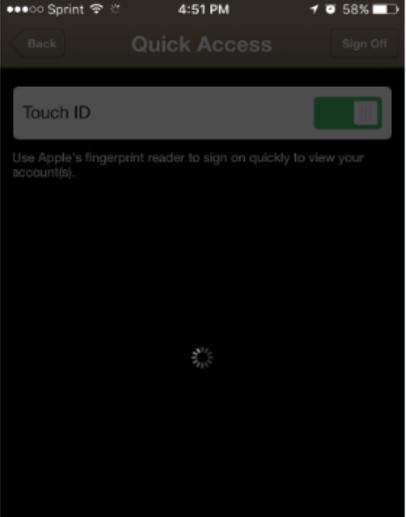

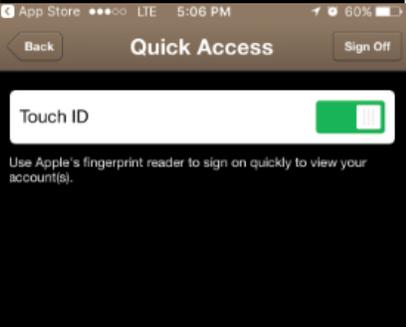

**You can now use your fingerprint scanner on iPhone 5s and newer devices (running iOS 8 or newer) to access Account Balances and Transactions.** This section discusses how to set up and use Touch ID functionality.

**Note:** You must first have enabled the Touch ID feature within your iPhone settings. Unless there are registered fingerprints on the device, FIS Mobile Banking Touch ID will not be able to function within their application.

## To Enable Touch ID, follow these steps:

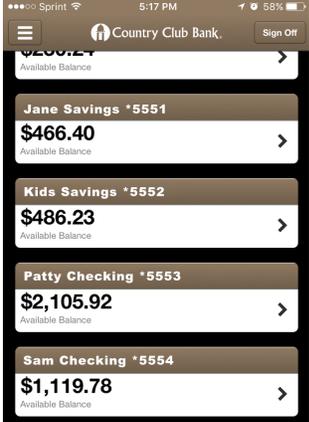

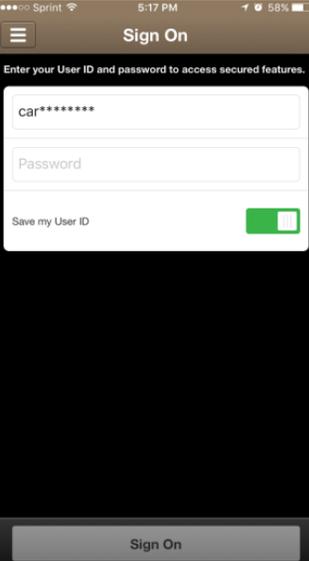

Step	Action	Display
1	<p>After logging in with your User ID and Password, go to Settings in the Global Navigation menu.</p>	 <p>The screenshot shows the main menu of the Country Club Bank mobile app. The menu items are: Accounts, Transfers, Bill Pay, People Pay, Check Deposit, Locations, Settings, Help, and About. The 'Settings' option is highlighted with a white background.</p>
2	<p>On the Settings screen, you'll see the Quick Access option.</p> <p>If this is the first time you are accessing Quick Access, green text with the word Setup will display. Otherwise, the currently enabled quick access option will be listed.</p> <p>Select Quick Access to continue.</p>	 <p>The screenshot shows the 'Settings' screen in the mobile app. At the top, there is a 'Sign Off' button. Below it, the 'Quick Access' option is visible, with a 'Touch ID' button and a right-pointing arrow next to it.</p>

<p>3</p>	<p>The Quick Access screen appears showing your available access options.</p> <p>Passcode allows you to establish a numeric code for accessing account information.</p> <p>Touch ID allows you to leverage the fingerprint reader on your Apple iPhone 5S or newer device.</p> <p>On the right, switches indicate if the feature is enabled.</p> <div style="display: flex; align-items: center; margin-bottom: 10px;">  <div style="margin-left: 10px;">A grey switch indicates the feature is disabled.</div> </div> <div style="display: flex; align-items: center;">  <div style="margin-left: 10px;">A green switch indicates the feature is enabled.</div> </div> <p>Select the switch to the right of the Touch ID field to continue.</p>	
<p>4</p>	<p>A warning appears informing you that all users with registered fingerprints will have access to account balances and information.</p> <p>Select OK to continue.</p>	

5	The screen darkens and indicates that it is loading while the Touch ID is being enabled.	
6	The Quick Access screen appears showing a green switch next to the Touch ID field indicating that it is enabled.	

**To Log in with Touch ID, follow these steps:**

Step	Action	Display
1	Locate and open the CCB Mobile app on your device's screen.	

<p>2</p>	<p>The Touch ID screen appears asking you to scan your fingerprint.</p> <p>You will simply place your registered finger on the device's home button to scan it and continue.</p> <p><b>Note:</b> While this screen is visible, you cannot hide the application. This screen is a part of the device's operating system, not the application. The screen would need to be cleared by scanning the finger, selecting the Enter Password link, or by selecting the Cancel link before the application can be hidden.</p>	
<p>3</p>	<p>You should now see the Accounts screen.</p> <p>All balances and transactions should now be available.</p>	
<p>4</p>	<p>Attempting to access any feature other than Accounts from the global navigation menu will present you with the standard login screen for full authentication.</p>	

**Note:** Registered Touch ID fingerprints cannot be changed via the FIS Mobile Banking application. You would need to make any changes, such as adding or removing fingerprints from within the settings on the device itself.
